WHAT CHANGES FOR YOU

FROM INSTINCT TO MASTERY

Most coaches teach by instinct. After Level 1, you teach from knowledge: every diagnosis is based on science, every lesson has a clear goal, and every singer improves faster.

SCIENTIFIC

You understand the voice as a system

- Diagnose vocal imbalances — by ear and with objective data
- Read Voice Scan reports: zones, efficiency, acoustic parameters
- Find the root cause of each imbalance, not just the symptom
- Use exercises made for that imbalance — not generic warm-ups

ARTISTIC

You unlock a voice's full potential

- Find and strengthen each singer's own voice and identity
- Plan long-term vocal growth — not just quick fixes
- Train every style: CCM, classical, musical theatre, pop, jazz
- Build range, tone, flexibility and dynamics with a healthy, science-based technique

PROFESSIONAL

You build a practice that grows

- Become a certified MVT Vocal Coach, recognised by leading universities
- Stand out in your community as a professional
- Get your profile in the MVT and Voice Scan LAB directories, where singers worldwide look for a coach
- Join an international community of 700+ coaches

BY YOUR FINAL LESSON YOU WILL BE ABLE TO

Work with any singer and know what their voice needs — and why

Read a Voice Scan report and teach from it, with data to measure progress

Plan complete lessons with a clear goal

Speak clearly with any singer, at any level

Run a studio built on solid teaching methods

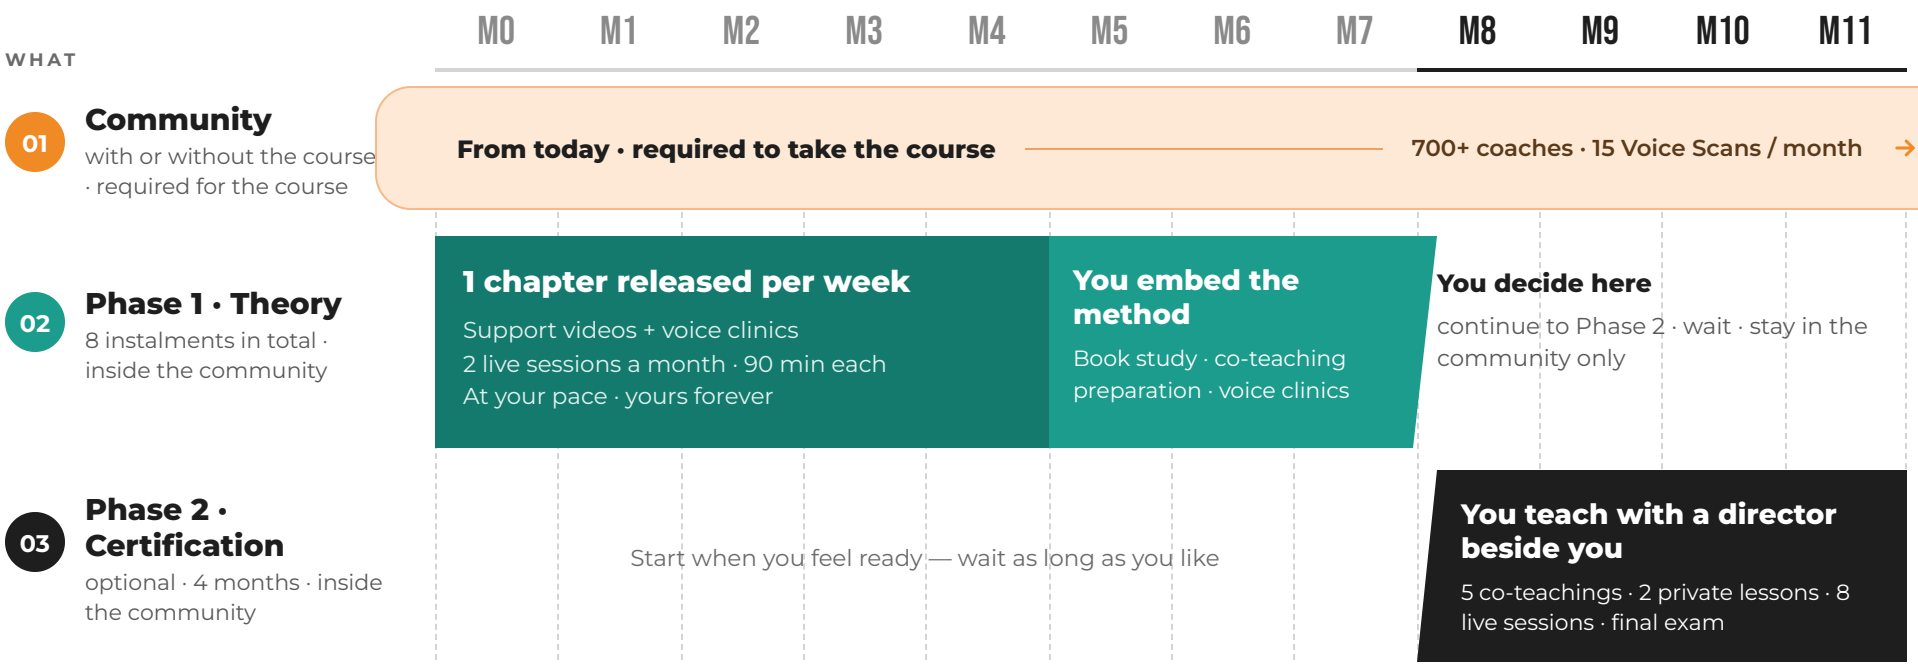

Teach with confidence

The community and the course are two different things: you can be in the community without taking the course, but to take the course you must be in the community. THE VOICE SCAN · LABMVT EXCLUSIVE TECHNOLOGY

SEE WHAT YOUR EAR CANNOT

Sing one set of scales. In seconds, you get a **scientific X-ray of your voice**: a score, every zone of your range measured, your strengths and your next steps. This is a real report.

ENROL ANY DAY · PRICING ON P. 5 →

HOW IT WORKS

1. **Record** — sing 16 short scales on /A/, from your lowest to your highest notes.
2. **Analyse** — closure, clarity (CPPS, HNR), jitter, shimmer, formants F1–F4 and harmonics H1–H20.
3. **Classify** — each zone is labelled balanced, pressed or light phonation, or configuration change. Your teacher can review every label.
4. **Track progress** — your score sets your level, from 1 to 12. Scan again every month to see your progress.

EVERY REPORT ALSO SHOWS

Scale by scale
Your pitch line and a spectrogram of every scale.

Your vocal mechanics
Jaw, tongue, larynx and harmonic brightness.

Your vowels
Which vowel really dominates in each zone.

Voice health
A guide check of your acoustic health.

15 **Voice Scans every month**, included in your community membership.

> ***"For the first time, a teacher can show a student exactly what is happening in their voice — not in words, but with real, objective data."***
>
> On the course you learn to read every report and use it with real students from day one.
